CJ Equipment supplies new and remanufactured components for large surface mining equipment. CJ will not compromise quality for price. We know that in the Mining Industry equipment is pushed to the maximum and often operates 24/7. That is why our products come from reputable manufacturers that have been around for years. Our suppliers are innovators in the industry. To ensure customer satisfaction, CJ Equipment believes that it is just as important to have a good relationship with our suppliers, as it is with our customers.

Our qualified and experienced mechanics can also rebuild your component by time and by material at competitive prices. We will disassemble, clean and inspect your core and provide an itemized list of requirements to rebuild your component. Your rebuilt component will be backed by our 1 year warranty. Quality workmanship goes into every component we build. CJ has over 35 years combined experience selling Heavy equipment parts.

Trust in us to give you quality parts and quality service ...We won't keep you holding.
